The borders between inside and outside are fading. Gardens and patios are transforming, becoming living spaces; new and diverse links are forming between nature and architecture. This new Zeitgeist inspired Création Baumann to design a new collection that is at home in both worlds: INSIDE/OUTSIDE.

The fabrics in this collection do away with apparent contradictions easily and without complications - thanks to their intrinsic and extrinsic value. Plain textiles combine playfully with abstract designs and floral accents, earthy tones blend effortlessly with fresh pastels: these lightfast, durable fabrics are perfect for indoors or out.
