

CRÉATION BAUMANN PRESENTS SOLUTIONS FOR VISUAL AND ACOUSTIC ZONING

The Swiss textile specialist Création Baumann is a pioneer in the field of acoustic and visual zoning of open-plan spaces. With the exciting new products FILACOUSTIC, PEPPER and TROPEA, the company is expanding its portfolio with innovative and aesthetically pleasing acoustic and room zoning fabrics. With versatile classics and new products, the textile specialist always manages to strike a balance between producing highly technical fabrics that also look appealing. Création Baumann once again underpins its pioneering role and technological expertise with special production techniques at its own factory in Langenthal.

Open-plan spaces require flexible and multifunctional design concepts. Textiles as flexible architectural elements offer the ideal solution for quickly and easily structuring working environments both visually and acoustically. Over 20 years ago, Création Baumann developed the first acoustically effective textiles for architects and planners, which are still pioneering products today. With its new textile additions, Création Baumann characterises the spatial atmosphere on an aesthetic and acoustic level. The pioneering solutions for modern room zoning are developed and produced entirely at the Langenthal site in Switzerland.

Visual zoning with the technically sophisticated PEPPER and NAXOS leno fabrics

With the new PEPPER and the classic NAXOS in new colours, Création Baumann presents solutions for room zoning. The two semi-transparent products are characterised by their special leno technique – a sophisticated weave that requires the highest level of expertise. PEPPER impresses with its mottled weft yarn, which gives the fabric a soft, voluminous look and a wool-like feel. NAXOS impresses with its sophisticated colour effect: the combination of different coloured yarns in the warp and weft creates depth and an elegant sheen. With technical finesse and aesthetic versatility, both textiles emphasise Création Baumann's expertise and enable precise room zoning.

Acoustically effective zoning with the classic ALPHACOUSTIC and the innovations FILACOUSTIC and TROPEA

In the field of acoustic solutions, Création Baumann presents both a proven classic in new colours and innovative new developments with outstanding acoustic values. The highly functional fabric ALPHACOUSTIC was developed back in 2012 as one of the first transparent acoustic fabrics in the world and is still a successful classic today. The new generation, FILACOUSTIC, impresses with a natural, simple look created by two varying weft colours. Thanks to its fine look and light feel, it blends harmoniously into a wide variety of rooms.

With modern digital transfer printing, TROPEA sets new standards as a versatile acoustic absorber – ideal for use as a partition curtain, ACOUSTIC DIVIDER VARIO or as an acoustic panel. The graphic design with clear, abstract lines is inspired by plant leaves and shows leaves in modern, geometric shapes. Its generosity allows the use of continuous surfaces for impressive visual and highly functional room design.

The continuous further development of its textiles once again cements Création Baumann's pioneering role in the field of highly functional and innovative acoustic and room zoning fabrics. This is made possible by extensive research and development expertise and special production techniques at the company's own factory in Switzerland.

ABOUT CRÉATION BAUMANN

The forward-looking Swiss family business Création Baumann designs, produces and sells innovative textile solutions for interior design. These are used as creative and functional long-lasting elements of interior design and meet the requirements of functionality and design as well as the protection of people and the environment. The brand's portfolio includes acoustic solutions, furnishing textiles such as curtain and upholstery fabrics, functional textiles and systems for interior shading.

A global leader in acoustic solutions for interior design, the brand has been driven by a pioneering spirit for more than 130 years, which continues to provide textile innovations. Challenges in architecture and interior design, a deep passion for design and interior decoration as well as a high level of technological competence are central to the development of innovative textile solutions by Création Baumann. The textile collections are characterized by timeless, clear design on the one hand and strong character and decorative designs on the other. In order to do justice to the protection of people and the environment, sustainability is a central component of the Création Baumann brand. With a significant share of production processes in Langenthal, the promotion of recycling processes at all stages and the uncompromising quality standard for the longevity of the high-quality textiles, Création Baumann reduces the environmental impact of the production of its textiles to a minimum.
