A fabric for modern room concepts: A highly functional product that offers exciting solutions for a creative working environment.

### **Starting Point**

In addition to the classic work areas, the newly realised working environment includes an open and communicative space, the think tank, with a lounge area and blackboard wall. Adjacent to this is the meeting area as a place of retreat, and on the other side is the reception area with an open kitchenette.

### Solution

A concept adapted to the requirements of the room and supporting the creative working environment. Curtains are used for flexible room zoning and optimise room acoustics. The double-face fabric is a highly functional product in terms of colour design and feel, offering an exciting solution in the room with its two sides.
