# UNILEVER Group Headquarters DACH «Neue Burg»

Textiles support the design and spatial effect of the diverse multi-space landscape.

#### **Starting Point**

Unilever's DACH headquarters moved from Hafencity to the centre of Hamburg.

In a co-creative process, the employees developed the design for the new building together with the planning office.

The result is a diverse multi-space landscape with very different design impressions and a variety of activity-based working scenarios. The space is divided into different areas that offer the employees new working worlds.

#### Solution

Room dividers made of the acoustic textile Lord were placed on all floors with a custom-made wooden frame. The fabric was processed with a pleated band, which provides for a visually appealing drape of the material. The room dividers serve as a zoning element. The fabric can be pulled open if necessary, opening up the area even more.

Deltacoustic adorns the window surfaces in the communal areas and creates a special feel-good atmosphere with its lightness.

In the meeting rooms, Gammacoustic, which is also acoustically effective, provides semi-transparent privacy without unnecessarily shielding the room.
