# punkt6, HOUSE OF MATERIALS – Thun

Transparent acoustic fabric from Création Baumann.

## Starting Point

With «punkt6», the strasserthun material pioneers have created a world where planners and designers can experience innovative materials and finishings up close – in an atmosphere that is refreshingly different from traditional showrooms: The architecture is completely focused on providing a backdrop for the pure display of the materials.

## Solution

Light control and noise absorption are the central challenges in the 750 m<sup>2</sup> exhibition and office space. The transparent acoustic fabric BETACOUSTIC enables these challenges to be mastered with brilliance. Its sophisticated elegance and excellent functionality – with an Alpha value of 0.65 – contributes to the space concept.
