# Havas WW – Brussels

Materials are wanted for the new site of a company that express its values.

## Starting Point

The company "Havas World Wide" in the heart of Brussels intended to use the new concept to create a site combining the full expertise of the Havas Group. This new site, the so-called Havas Village, aims to create a stronger link between people and brands with creativity, new media and innovations. For this reason, materials were required to support this project and give the premises a certain freshness at the same time.

## Solution

The company opted for the transparent SINFONIA VII curtain fabric in white and six different shades of blue. This fabric has a positive effect on the room acoustics and lighting and creates privacy, thus reflecting the versatility of the company. SINFONIA VII gives the premises the desired freshness and gives creativity free rein thanks to the wide range of colours.
