

Office

# BEA Special Co-Living Show – Bern

A tailor-made open office solution that lends a homely touch as a room divider in office premises and provides tranquillity with its sound-absorbing function.

## Starting Point

Today, interior designers are often faced with problems related to the room acoustics in open offices. daskonzept will present innovative concepts for interior design at the BEA Co-Living trade show.

## Solution

The semi-transparent PRINTACOUSTIC curtain fabric lends a homely touch with its aesthetic design and provides tranquillity in often hectic office situations with its sound-absorbing function. Hanging the fabric in open areas can quickly and simply create a separate room and invites trade show visitors to move around freely therein.
