# Les Deux Brasserie – Munich

Visual and taste experience in harmony.

## Starting Point

The Brasserie Les Deux in Munich wanted a new interior design that was modern yet stylish and invited its guests to stay. Therefore, only high-quality, highly functional and aesthetically exacting materials were used to create a pleasant ambience.

## Solution

The brasserie now shines in all its glory: Direct, sophisticated and with a certain air of coolness, it invites its guests to stay. Elegant marble and subdued colours lend the room a contemporary feel. The mesh fabric with its technical air blends perfectly with the design concept while enabling an unhindered view of the outside despite its glare and heat protection properties.
