# HIB house – Tokyo

Harmonious fusion of elegance and functionality.

## Starting Point

A home set in a peaceful residential enclave, exuding a blend of timeless classic design infused with contemporary Italian elements. The architectural structure takes the form of a U-shaped building with three storeys, complemented by a basement, all surrounded by enclosing walls.

## Solution

In this residence, every single detail has been designed with great care, resulting in an exquisite and carefully refined environment. The seamless integration of furniture and the use of first-class curtains such as the DIMMER IV blackout curtain and the transparent SINFONIA CS VI blend perfectly into the overall architectural picture, creating a harmonious fusion of form and function.
