# 8 Water Street – London

The harmonious interplay of design elements and curtain fabric.

## Starting Point

Wood Wharf in London's Canary Wharf offers innovative office, retail and residential space in an idyllic waterside location. Developed by the Canary Wharf Group for Vertus, the modern 8 Water Street building is a successful symbiosis of architecture and living space. The Accouter Group of Companies has created a stylish aesthetic through a clever combination of colours and textures.

## Solution

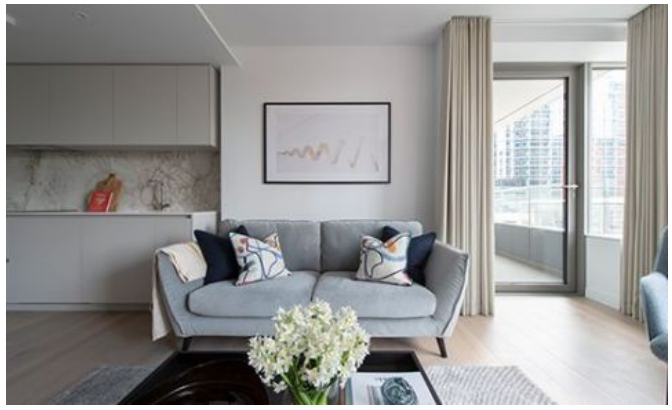

The solution for the living spaces at 8 Water Street is characterised by large windows that provide light. The customised colour of the LORD curtain fabric gives the rooms a timeless elegance. The combination of different design elements, together with the soft drape of the dense curtain fabric, creates a living atmosphere that is both functional and aesthetically pleasing.

## Object

8 Water Street, London, UK

## Concept

Canary Wharf Group, Vertus, AGC BTR

# Textiles Used
