# 3Sixty Skybar – Stockholm

SILENT LIGHT acoustic curtain: the elegant answer to acoustic challenges.

## Starting Point

The 3Sixty Skybar in Stockholm is an internationally renowned restaurant and sky bar on the 25th floor with a breathtaking 360-degree panoramic view and an elegant 1920s flair.

## Solution

A carefully considered solution was developed to address the acoustic challenges of the 3Sixty Skybar while maintaining the elegant atmosphere of the venue. The key to this was the use of SILENT LIGHT acoustic curtain fabric. This functional textile combines excellent sound absorption properties with aesthetic sophistication.
