

Office

New building – «Streit Service & Solution»

A new working environment that fosters a productive atmosphere through the implementation of innovative acoustic measures and flexible room partitioning.

Starting Point

Streit Service & Solution has relocated its headquarters and moved into a new workspace of over 2200 m². This spacious area offers room for all forms of work and integrates various aspects of New Work. The architecture and interior design harmonise perfectly and bring nature into the interior of the building.

Solution

The modern interior design utilises textile zoning to create quiet zones and flexible spaces: The ACOUSTIC DIVIDER VARIO with Noisesilencer was used to create various oval zones – fully or semi-enclosed. These optimise the use of space and offer both privacy and noise protection. The subtle, organic colours of LORD create an inspiring environment that reflects the surroundings. This creates a flexible, aesthetically pleasing working atmosphere that promotes productivity and well-being.
