UNILEVER Group Headquarters DACH «Neue Burg»

Textiles support the design and spatial effect of the diverse multi-space landscape.

Starting Point

Unilever's DACH headquarters moved from Hafencity to the centre of Hamburg.

In a co-creative process, the employees developed the design for the new building together with the planning office.

The result is a diverse multi-space landscape with very different design impressions and a variety of activity-based working scenarios. The space is divided into different areas that offer the employees new working worlds.

Solution

Room dividers made of the acoustic textile Lord were placed on all floors with a custom-made wooden frame. The fabric was processed with a pleated band, which provides for a visually appealing drape of the material. The room dividers serve as a zoning element. The fabric can be pulled open if necessary, opening up the area even more.

Deltacoustic adorns the window surfaces in the communal areas and creates a special feel-good atmosphere with its lightness.

In the meeting rooms, Gammacoustic, which is also acoustically effective, provides semi-transparent privacy without unnecessarily shielding the room.

商品

LORD IV

Art.-No: 0100130

商品カテゴリ: ドレープ

色数: 35

組成: 100% 難燃ポリエステル (Trevira cs)

生地幅: 150 cm

特記事項: 縦使い、横使い可

重さ: 349 g/m²

吸音: α_w 0.70

耐摩耗性: 60,000 マーチンデール

ピリング: 4

耐光堅牢度: 5-6

DELTACOUSTIC

Art.-No: 0101125

商品カテゴリ: レース/ケースメント

色数: 17

組成: 100% 難燃ポリエステル (Trevira cs)

生地幅: 300 cm

特記事項: 縦使い・横使い可

重さ: 125 g/m²

吸音: α_w 0.60

耐光堅牢度: 6-7

GAMMACOUSTIC

Art.-No: 0100885

商品カテゴリ: レース/ケースメント

色数: 10

組成: 100% 難燃ポリエステル

生地幅: 300 cm

特記事項: 縦使い・横使い可

重さ: 74 g/m²

吸音: α_w 0.50

耐光堅牢度: 7
